# **SPECIFICATION SHEET MODEL 611 (3" - 10")**

# Valve Setter Mechanical Joint by Mechanical Joint

### Valve Setter Mechanical Joint by Mechanical Joint

The model 611 mechanical joint by mechanical joint valve setter is constructed of fusion epoxy coated ductile iron. Valve setters are designed to augment the installation of the "N" series backflow prevention valves. Integral ductile iron support between elbows transfers thrust downstream, thus eliminating thrust block requirements between elbows. Mechanical joint restraint devices may be used at pipe connections, depending on local conditions.

# Ratings

Maximum Working Pressure 175 psi (1200 KPa)
Temperature Range 32° to 140° (0°C to 60°)

#### **Features**

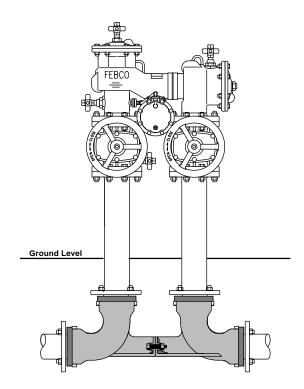

- · Corrosion resistant fusion epoxy coated.
- Eliminates the need for thrust blocks or other restraints at the point of installation.
- Flanges: ANSI AWWA C153 A21.53-88.

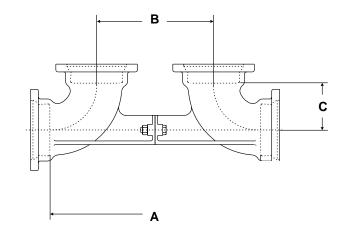

# **Material Specifications**

Part	Material
Body	Ductile iron A536 GR 65-45-12
Coating	Fusion epoxy coated internal and external AWWA C550
Bolts & Nuts	Stainless steel

\* Mechanical joint accessories and gaskets are not included (except for center joint).
